

Kairos Vault

Kairos will have a vault for its DAO. Team can be financed by it or can be invested as DAO does. Governance will have a say on this

\$KAI token

\$KAI token can be rewarded a percentage of the KAIROS vault everything month (10%) - governance proposal

\$KAI token can be the governance of the KAIROS DAO

Anyone can buy \$KAI, individuals or DAOs

Voting power on the DAO is given by stack + honour (or multiply). Only kDAOs can have honor.

Voting power from stack is defined by $f(x)=\log_2(x+1)$, so a whale is only incentivised to have KAI for the rewards and not for the voting power.

Only kDAOs, potentially, always have more voting power than individuals

\$KAI token

Another use of \$KAI will be as way to pay for fees on the ramps

Transak fees instead of being payed with UST can be payed with \$KAI, we can offer an incentive to use \$KAI on that

\$KAI will be burned when used this way, making the coin deflationary or potentially stable supply if we want to use \$KAI token to incentivise the use of the protocol (inflation)
